Message

Dear Governor Cooper:

I do not want the Atlantic Coast Pipeline in North Carolina. Pipelines are obsolete, they are dirty and pollute the environment, and they transport fuels that contribute to climate change. How many record floods and forest fires do we need to have before we start taking action on climate change? Pipelines, and gas, oil and coal power plants, will be obsolete soon. We have to stop this. Do not contribute to more pollution and climate change at the expense of the population of North Carolina. I have lived here 20 years, and spent another 20 years wanting to live in North Carolina. Keep it beautiful. Keep it clean. Keep it safe for future generation.
